Certified Engineering of NJ (CE) provides a wide range of services, which includes Transportation, Public works, Residential Site Improvement projects, Stormwater Management and Flood Control projects, Environmental Planning and Permitting, Wetland Delineations, Surveying and Construction Management. We have served as the lead Design Engineers and Construction Managers from concept and real estate evaluations to final construction. In this respect we are a multi-disciplined firm, which offer a variety of design approach and techniques, from initial practicable project conceptual phases to final design and construction. Our goal is to provide our Clients with practicable, cost effective and maintenance "friendly" projects using our vast experience.

TOTAL CLIENT SERVICE CONCEPT ~ CE realizes the importance of responding to our clients' needs in an expeditious and cost conscious manner. We have the experience, personnel, and resources **available** to keep the projects on schedule and on budget and are ready to meet all challenges. As part of our **Total Client Service Concept**, we will develop a schedule for all our projects to monitor and constantly update the project's status so that our team members meet all project deadlines, milestones and budget status. All deadlines are planned for and met, by our professional staff.

Our commitment to scheduling and budgeting, coupled with our multi-disciplined staff, well trained experts and advanced technical experience, will allow an immediate and timely response to our clients need.

PLANNING SERVICES

- 1) *Master Planning*
- 2) *Zoning Studies*
- 3) *Annexation Studies*
- 4) *Wastewater Facilities Planning*
- 5) *Economic Development Studies*

CONSTRUCTION MANAGEMENT AND ADMINISTRATION SERVICES

Certified Engineering of NJ construction teams monitor the projects from start to finish. We work closely with the Contractor(s), Owner and Government agencies for effective control of engineering and construction schedules, progress, cost and overall project control.

Our experience and expertise in Construction Management helps us effectively monitor the projects, so that all phases of construction are carried out in accordance with the plans and specifications.

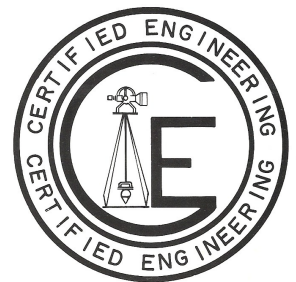

LAND DEVELOPMENT SERVICES

Our expertise in land planning, development, engineering and related disciplines allows us to provide our clients the most feasible development studies, which enables us to coordinate with the clients, their financial advisors, attorneys and related staff to effectively deal with a broad spectrum of technical, economic and social issues for the development of the project.

We pride ourselves in being able to prepare the plans in the minimum amount of time possible and have the capabilities to obtain approval from the Municipal and State review agencies in the shortest feasible time for the successful completion of the project from start to finish.

SIMPLY ASK FOR OUR PROPOSAL

You'll find CERTIFIED ENGINEERING OF NJ provides a higher quality and better service every time. We welcome the opportunity to serve you and provide company references, staff resumes and other information upon request.
